DETAILED ACTION

Information Disclosure Statement

Prior office action(s) have indicated that the listing of references in the specification is not a proper IDS. However, as applicants correctly point out in their response dated 3/23/2007 there is no listing of references in the specification, therefore the previous remarks regarding the prior art located in the specification should be ignored as they are erroneous.

Claim Rejections - 35 USC § 102/103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP43-14120.

The '14120 document discloses the use of a plurality of punch rollers in order to form a progressive recessed portion in a pipe member (see figure 2 and translation). Lacking any clear distinguishing features a headrest stay is read on to the pipe member as disclosed in '14120.

Should '14120 be later deemed not to meet claim 1 because it does not disclose that the recess is formed in a headrest stay, it would have been obvious to utilize the

method of document '14120 in a process for manufacturing a headrest stay since such would only depend on the final product desired.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
